Your answer

You receive an urgent email from "VIT IT Support" stating your account will be locked in 2 hours unless you verify your password at "www.vitbhopal-security.co." What is the correct action? * 1 point

- Immediately click the link and verify your password to avoid being locked out.
- Reply to the email to confirm if it's real.
- Do not click the link. Instead, verify the sender's actual email address and report the email as phishing to the official university IT helpdesk.
- Forward the email to your friends so they can verify their accounts too.

Which security measure is the most effective at preventing unauthorized access to an account, even if a hacker knows your password? * 1 point

- Having a secret hint question (e.g., "Your pet's name").
- Using a long password (over 12 characters).
- Changing your password every month.
- Multi-Factor Authentication (MFA or 2FA).

In 2-3 sentences, explain why a recruiter might check your public LinkedIn profile before hiring you, and one way you can make your profile look more professional. * 1 point
